hey i was making a "proper" co-op (one that actually works unlike the other crap one thats out, things like play as havoc etc.....)

but anyway i appear to have come to a halt does anyone know why but when ya get to fight petrova i jsut CANT get ur too be there   you get the cutscene but then shes not there

/me has tryied LOADS of thing but cant get it too work

anyone know whats stopping it   better not be one of those single player only scripts

I'd recommend skipping cut scenes and have Petrova fighting you as you come there.
