Currently in #n00bstories, we're running a Shoutcast server so selected people can be a DJ for the channel.

Currently I'm the one playing music. Metallica right now.

Got about 90 other songs to play, though, ranging from 80s, classic rock, techno, trance, metal, hard rock, soft rock, all that great stuff. No rap, no R&B, no country.

[[04:11]] [n00bstories Radio] Aircraftkiller is Playing: "Metallica - For Whom The Bell Tolls". Listen

I would of take it in a thoughtful manner but it seems like you are judging a whole genre just beacuse of what one artist says. And mostly everything you said is not true. Cause most of all the Hip Hop/Rap and R&B that I LISTEN to does not promote that type of stuff. It seems like to me you are judging those type of genres cause you do not like them. Which you should not do.

True, but see I like all types of music. Doesn't matter if its Rock, Rap, Hip Hop, 80's, 70's, Disoc, etc. I like them all. Hell I have music dated back to the 1950's.

My whole point of what I'm trying to say it do not say it sucks just because you do not like it. Cause its very disrepectful to the people that that make it and listen to it. Seriuosly I mean they be some artist I may bot like that my friends like. For example, One of my friends like N' Sync. Now me, I do not like N' Sync. Now I'll say something like, "I like don't like N'Sync" but I will not say they suck just because I do not like them. Cause I know many other people like them and I repect their opinons on why they like them.

See i get tried of people saying, "Rap sucks" or "Rock sucks" just because they do not like that type of music. Its ok for you not to like it but you have to say it sucks now do you. I mean I have the same respect to say the stuff you listen to does not suck you can show me the same respect too.

I have been listening all day long. Sometimes it craps out and lags. The n I just go to my own MP3's for a bit until a new DJ comes up.

It is cool to hear people announce the next song. Then I don't have to always switch to winamp to see what the name of the song is.

Debates, discussions, recorded in teamspeak and played back on "the air"

English Muffins with DaveGMM

Why dont you let whoever is DJing pick the music

Set up rules like No F n S word in the songs

Whatever the DJ wants to play is what plays as long as it keeps within the rules

Take turns with the DJ so people that like music from this century dont always have to listen to the crap ack likes

I would love to DJ i dont listen to gangsta rap but i dont listen to classical crap
Plus u would talk on the radio like a normal DJ.

flame on :rolleyes:

I'm not quite sure how to, but how can I view the songs that come on, becuae sometimes the names of songs aren't told, and some I would like to find and download,,, I liked this one about hackers and how they are flesh and bone and who wonder through the halls of a machine..something like that lol, but I have no idea how to find the name of that song

We can avoid this whole mess.

Just stream off of WAAF 's site out of Boston. Kickass music, and hilarious DJ's.
