I went to EB in the mall and had to pick between getting Renegade so I could install the internet shared components so i could play on WOL again, or buying America's Army strategy guide w/ a free copy of the game. I know you download americas army but it would never work for me nomatter where i tried to get it from. In the end I bought americas army cus my cousin said it was better than renegade and more realistic. Not that Renegade can even be compared to real life tho lol.

Hmmmmmm... I could have sworn that the shared internet components used to be on the WS ftp, but I can't see them anywhere.

Seriously you BOUGHT a FREE game. Whats wrong with you.

And AA isnt my type too frustrating. Being realistic doesnt make it a good game

If you msut reinstall shared internet componets and you erm..... lost your CD1 (yeah I know you play with your ORIGINAL CD2),
downlaod the FDS, install it. If you need shared Intenretcomponets, it will install it and rengade can use it as well.

But don't deinstall FDS then, becasue for some reason it deinstalls the Shared Internetcomponets together with FDS.

If you have a small HD and need the 100 MB or whtever the FDS needs, delte the DATA dir of the FDS.

for those of you who dunno where to get FDS:

<ftp://ftp.westwood.com/pub/renegade/dedicatedserver/>

Hope that helps somebody.
