I'm having trouble locating the blank ones atm, you can find quite a few finished ones here (by me and taximes) <http://www.laeubi.de/halo38/?cat=modfiles>

I'll mail you when I find them

Now that I look at those from so long ago, they seem kinda grainy

I might redo them

Edit: Redone

If anyone wants to upload them to a more reliable host, go for it

What's the orange one for though?

For my next map project, I might add extra characters. Since I'm crap with Photoshop, I was going to use your PT icons. If it's okay with you, I might want to edit some of them such as swapping some of the weapons around if that's okay with you?

Since it's your work, I'll give you full credit.

The mod is called : Pistol Wars

The model was made by adavanze (AKA Typhoon or DrkFlow)

It uses objects.ddb but not the original PKG ones,so you can play it on every-map

I am planning to give this UN APC have an weak mg

The mod is released already,you can download it on the forums on my siggy (Its in the uploads section) and it don't have the UN APC on this version,and you need to register to download it (The key that is sent by mail is sloooooooooooooooooooooooooooooow) lol
