It is DAMN obvious that some people are cheating on the server, can you just ban these people for the love of god? When someone has 1000 points in the first minute of the game and everyone else has max 10 points hes cheating, its just not possible to be that good, so I dont want to here any of this bullshit requests significant prood, this game is DEAD right now, NO ONE CAN PLAY SO DO SOMETHING. RenGaurd is taking way to long, you have got to do something, because whoever is running a server with cheaters on it is running a server that is a JOKE

well.....

IF YOU SAY REN IS DEAD ONE MORE TIME ILL HUNT YOU DOWN!

also there is stuff being done about cheaters and thay are getting banned but theres always another n00b that will take hes place.

the Ren Gaurd project is done something and so is the 2 other anti cheat teams, one of which is mine.

Off Topic: What im propossing is that teams all come together under one roof to work on the anti cheat. this would effectivly incress out put and get it done faster and there would be less compition between teams as there is right now.

You propose this because you have nothing, and you want to join in on another teams progress. There is no competition between teams because the RenGuard team is working on something, and you're not. And if you are you haven't visibly shown you are, and a huge essay on what

you're going to do for the "movement" doesn't count as progress.

You know, if "groups" like you would stop bugging the team about "consolidating" or "joining under on roof", they'd get done faster.

just picking up where TA left off, you do not know where TA left off because it was never

what cryptowizerd actually said about ren guard) but according to him there hardly doing anything. There may be no competition but it we merge all the teams then we will have a better anti cheat quicker, and did I say anything about merging too case 9 studios? No I said merge which means

Infini.....

You know nothing about the coding nor the hard work it is to code a program.

I Appointed you for your experince in moddign and such not for programing or pr.

And Don't go off starting all this crap without asking the team.

Leave ever thing dealing with programing or coding to me and the other members in the group who have progrmaing experince

umm those servers WHO do HAVE admins.. are working hard to keep them all banned.. but we all have lives and cant sit on the server all freaking day watching out for cheaters...

we exchange names and IPs to keep them banned from 60% of the servers.. the mains ones anyway.. thats the best we can do..

Yes there are cheaters, do you have to play with them?... No

Join a server which has many moderators and people you trust eg.... Renstation, Moonlightshakers and The Pits.

The rengaurd team have alot of work to do so let them do it... unless you think you can do better (exactly STFU), Windows XP was hacked with an hour of it's realise do you want to same to happen to rengaurd.....thought not
