I havent played Renegade for quite a while and just reinstalled it today. I have a few questions that I forgot how to do. How do I show my fps? How do I get rid of those movies in the start of the game? And....I never remember having to keep switching disks everytime I started the game, how come its doing it now?.....hmm Thanks!

!) To show your FPS in the game, hit the F8 or tilde (~) key and type in "fps" (without the quotes) and hit enter.

2) I forget how to get rid of the movies

3) Don't run the game through the autorun... it needs to verify both disks that way. Simply have one of the disks (I forget which one -but I think it's the Data CD) and use the shortcut icon.

Someone posted this in the old forums and I copied and saved it. I would give them credit, but I

don't remember who it was. Anyway, hope it helps.

Quote:I was just browsing the registry, and stumbled across some helpful Renegade values that you cannot normally change within the game.

This is really only for computer people who know how to use RegEdit. Even still, i'd like everyone to be able to do this.

I don't exactly want to encourage people to mess around with the registry, but it's pretty self explanatory once you have the registry editor open. To do so, press the Start button, click Run type "regedit" and then press the OK button.

For editing reference... change values to 1 if true, and 0 if false.

Default To First Person (choose your initial view mode) :
HKEY_LOCAL_MACHINE\Software\Westwood\Renegade\Options\DefaultToFirstPerson

Display Ping/FPS Info During Game (equivalent of enabling thru console) :
HKEY_LOCAL_MACHINE\Software\Westwood\Renegade\Options\FPS

Skip All Intro Movies (no more pressing escape twice!) :
HKEY_LOCAL_MACHINE\Software\Westwood\Renegade\Options\SkipAllIntroMovies

Ingame Quit Confirmation:
HKEY_LOCAL_MACHINE\Software\Westwood\Renegade\Options\SkipIngameQuitConfirmDialog

Quit Game Confirmation:
HKEY_LOCAL_MACHINE\Software\Westwood\Renegade\Options\SkipQuitConfirmDialog

Show The Ingame HUD:
HKEY_LOCAL_MACHINE\Software\Westwood\Renegade\Options\IsHudShown

Hope everyone finds these useful.
