I hate to be a bust, but your maps need some Serious fixing. do blending , do something! Make them look like real buildings. and that light tank scares me, I love this game, But i could go play the original version which i still have. Yours just looks like a funnier verison.

I don't mean to sound harsh, but give the light tank more curves, don't make it blocky like the n64 one. Make it feel more real.

P.S make your own medium tanks, and make the skins more alive.

P.P.S i didn't mean to be mean, but this mod needs some teaking.

Yea true but it looks as if that are just spitting out little 10 min models and skins just to make a mod out there but everthing can be tweaked right? I could make a couple tank models for you guys if you want ill post a pic on one but in needs to be uvw unwrapped, skinned boned.Same as Laser I dont want to be mean but if you/we put a little more effort it could look twice as good. Erm why dont we let them come out with the beta then critise they have made some awsome progress right? Yea they have! So give them a chance before wo go and put them down.

To tell you the truth i could care less about of the graphics are uber great look at renegade apc for example its like a slanted box with tracks most battle tanx models done look the same as renegades, graphics wise. Most Modification models look better than the original renegade graphics so if these guys models are the same I couldnt care less keep on working ill donate some models soon

Jeah. Most is with PH instead of F, but i think you would forget that too if english is not your main language.
german is harder to learn as english. My english problem is the grammar.

Hey Slayer. I can speak dutch. I damage a vacuum cleaner and turn it on. Then it sounds like dutch :twisted:
