Is there a certain limit on the amount of people allowed in this game? I have never seen a problem with it before, but when it was tried on a 50 person server last night, nobody could play. Everybody just got the "falling" screen as their number of deaths increased. I think 23 deaths in 2 minutes or so.

Anybody know why?

The server is running the wrong version of the map. The FDS doesn't have the terrain for that map in it's always.dat as it is a singleplayer level. When you or i host it we have the files from the always.dat. The server need to either download the correct version with the terrain W3D in or copy the always.dat from a renegade intall to the FDS directory.
