I don't trust the game until I play a demo. And on a related note, does anyone know if a demo release date has been announced?

u missed the beta it was pretty much open to everyone

They had a deal: if you pre order savage from gamestop.com or whatever they would automatically accept you for the beta. So what people did was preorder it then cancel it right away opening a spot for u in the beta.

I dont think they have a demo

The game is awesome. It is RTS & FPS basically into 1 game. Awesome graphics, amazing scenery.

I play online as "Xtrm2Matt"

They will release a demo soon. The demo will be human vs human only and include 2 maps probably eden and crossroads. Players with the full version will be able to play on the demo servers but ppl with the demo won't be able to play on the servers with other maps or beast included

They want to release a good demo and don't want to patch it later on like some other companies do ugh WS ugh :rolleyes:

yall gotta check savage out. i was a big renegade fans but this is better there more people playing than renegade. Its 10x more addictive and believe me i really loved renegade. The community is split in 3 parts now tho cause of beta patches but in about 1-2 weeks everything should be fine. The new beta patch really improved lagg and frame rate. The game runs sweet and tis so intense, already some clans too, you guys have to check it out
