lag what a wonderfull thing NOT...
any one got some tips on how to reduce lag? i was playing in a server today (im mod of it) and
every day theres huge lag, today was the worst where your drove for about a minute then you
lagged back to your original spot then 5 minets later you would find your self in some random
location created from where you moved from the spto you laged to to where you went WHICH IS
REALLY FRUSTRATING.... so any one got any tips on how to reduce it?

to start off:
press F8 C then ENTER this reduces lag if your not in proximity or looking at any moveing
objects.
