Hi guys,

I'm looking for a demo file, so I go to the main Renegade website.

But the menu doesn't load for me! Is it my computer settings or does it not work for anyone else either!?

Here is a link for those who would be lazy:

it's been like that for a while. download it from westwood ftp:  
<ftp://ftp.westwood.com/pub/renegade/previews/demo/>

then proceed to download the patch for it from <ftp://ftp.westwood.com/pub/renegade/updates/>

or buy the game for 10 bucks
