Hmmm I would like to here more about it but for one your main page doesn't work and two you have no direct information about what the mod is 'about'...

So many people set up web pages and abandon the mod halfway through or just end up with a mod that isn't anywhere as good as what the website states.

You need to give a little more information on the mod before really going round advertising it "A Mod that makes Renegade more advanced" is hardly a very thorough description, maybe when you let out more information some people will take an interest .

P.S. You might want to check how you're using capitalization on your website.

alright...

now its just going to be Renegade more advanced! heres a little info im making a writeup but its

---

not done!

Time: 50 years after cnc renegade

This mod is a total conversion of the Original CnC Renegade Game! it takes place 50 years after the Renegade game, The Units are more advanced! There will be machines and Humans Working together to defeat the evergrowing forces of Nod which also have much much more technology! Havoc and Dead 6 will be replaced I was actually thinking that Havoc was such a good commando that GDI decided to build a prototype of him! so Havoc would be remade so he had robotic arm likes the alcolote and other Robotic parts! maybe with a little higher jump and a bit faster and same goes for Sakura! The Tanks wouldnt go the same way they would be whole new tanks and vehicles, i was thinking maybe even a modified VTOL F-18 Hornet which would be cool!

Right now i dont think i will abandon this mod, so far i have 2 skimmers and 1 mapper! and i really need modelers! I think it would be cool!

[EDIT] the site had some downtime but it works now
