These forums are all made up of php and css. Replacing them with a single photoshopped backdrop (which IMO is all too common these days) would not work.

However, it would be possible to make other themes, perhaps this one could be "C&C:Renegade Forums Classic", and others could be added that have different colors, fonts etc. Its up to Crimmy.

Another thing would be to put all the colours in a .css file and give registered users the ability to

choose different skins.

Don't know if that process is used by the pits, but with that forum you can choose from many different forum styles.

It took me two days to make this theme and I had to edit the PHP code to add features that phpBB didn't have... to add another theme would be a bitch... it wouldn't take as long as last time, though.

Well, personally I think that this community as evolved since the first Renegade days, we've gone thru' many things, we've made many things, and we need something to reflect it.

I like it the way it is. No need to try to fix something that isnt broken.

Golds, Grays/Reds, and Blacks would be good. (GDI's and Nod's color + Black)

But the greens are still good, they're supposed to represent Renegade/tiberian, there's nothing wrong with them.
