Made an YZ dock icon for renegade

Right click and save as .png to your icon folder

a small low resource program that is placed on your desktop to hold shortcuts to anything on your pc.

Just drag an icon from a folder to the dock and you have yourself a neat desktop.....edit icons,target folders ,colors and schemes.

<http://www.dockicons.com/>

d-load the yzdock and the icon pack and your good to go...any.png can also be used as an icon...what i did was just give the bio_neon.tga an alpha channel and then save to .png,thern i had myself a new icon.

I also made that Souseek icon if anyone wants it.

Why the fuck do you still have nabster still installed?!

Did you not get the memo?

...its not napster...I like the napster icon so i used it for a music program folder

I figured someone would say something about that.
