Your English isn't too good but from what you said I take it you have a working FTP server that you wish to host RenAlert on. You can freely upload the file according to <http://www.renalert.com> as long as you link back to the website (<http://www.renevo.com/renalert>). Then you contct the leader of the ren Alert modification at L3f7H4nd3d@n00bstories.com so they can add your mirror to the list.

If your FTP server has any sort of bandwidth restrictions then the file will eat them up within a day so unless you have a fast FTP server with unlimited bandwidth there isn't much point in hosting it.
