Quote:The demo for Savage: The Battle for Newerth has been released. Download it now from your favorite file donwload site. Savage is considered by many to be the first title to seamlessly meld two separate game genres, real-time strategy and first-person shooter, into one game. Savage has been rated "T" for Teen by the ESRB.
You will only be able to play as human. There are 2 maps to play on eden2 and crossroads.

Mirrors:
happy puppy
Bit torrent windows only
3dgamers
fileshack

go and buy it now...they are adding a patch end of this month whihc will bring in new characters,mods and maps. Also you probably will have Capture the flag, DM, TDM,Kingof the hill.

plus good clan games, coz the lowest you can play is about 8, but standard is a 10v10.

now go buy

these devs are very commited to this game, i usually am able to talk to them whenever, very good support.

bonuses are they let you test patches, we had a patch a week ago, but in the week before they put out beta1 for us, then beta2 and beta3. then the patch came out.

Also there is no real online tutorial, you can go read forums or go to http://www.3dactionplanet.com/savage/ there are something to help new people and stuff.

View Forum Message <> Reply to Message

No single player
Multiplayer only
No monthly fee

Subject: SAVAGE DEMO RELEASED!
Posted by General Havoc on Thu, 09 Oct 2003 22:08:30 GMT
View Forum Message <> Reply to Message

It's multiplayer only but there is no fees to pay monthly, it makes that clear the the exitscreen of the demo. Mainly because it is not a typical MMOG where you play on thier servers. You have up to 64 players on a server hosted by someone, much like Renegade is. This also makes it not really a MMOG on a way but the gameplay is great.

It's a FPSRTS game (First Person Shooter - Real Time Stretergy). One person is the commander and they control you like you would do in a RTS like C&C for example, you can build building then drag abox around some guy and tell them to build it, you as the players in the field can either ignore or obey the command. There are also NPC workers who mine and build for you but you get XP for doing some work. Playing as the commander it's like playing a C&C game except the people are human so you don't have the full control, the good thing is that they are better than any AI you could program.

For most of the time you will be in the FPS mode on the field unless you choose to be a commander. I've got the hang of thing and I've only been playing for 2 hours. It's real fun atm anyway.

I can run the game at 1024x768 with everything on high with no problems, but my system is built to run Planetside so If you struggle with Renegade you may have a little trouble on higher detail levels - I recommend you play it though, even if you hate it, you will love it for at least a day.

great game, i might actually consider buying it:

to other idiots like me, make sure youu have your latest chipset driver, otherwise the fps will stay VERY low.

Well, I downloaded it. Very fun but annoying when you try your hand at command and all the people bitch about you. "Your a n00b, you shouldn;t command since uou haven;t commanded before." "Well I wouldn;t be a n00b commander if you LET ME DO IT ONCE."   Gees that happened three tiems today, first 2 minutes of command and I'm impeached because I never commanded before.

haha

You should host your own server to try command first to see everything then join a small server to do your first real commanding.

I've had this demo since it came out. Personally I think this game blows. The only thing that actually works near perfectly are the ranged weapons. The rest of the game is just a pile of bugs put together in one room.

wow sounds like someone got owned in Svg.

maybe you need to go back to a shooter game...and so you know Savage is not a shooter game, its melee combat mainly

I think its boring...What is boring? that you need skill to get good?

You should give feedback. Its a lot like renegade only better because you got a commander. The only bad thing IMO is no real vehicles.

And S2 gives good support unlike EA. You don't even have to pay monthly to get lots off updates....

I certainly like the game. I'll probably be buying it soon.

Now you guys who play the game and post in their forums need to advertise n00bstories.

I tried playing the demo and only played two games. Each time it was really laggy. My computer specs are 1.4G P4, 64 md Prophet III Ti200, 256 mb of ram, windows 98, and a cable modem. Maybe it's my computer or i'm just on a bad server. What do you all think?

It might be your video card. But I thinking it's more along the lines of the server being bad.

It might be RAM or your OS.

By the way. I'm not sure if that Video Card is supported. Sounds like a Nvidia card, though.
