I know some mappers out there have conyards but never noticed if they actually repaired.
Anyone know where to get the scripts for con yard repairing the buildings?

Actually...yes i did :stern: I found something about a script which u have to give all the building
ids or whatnot. I cant find it in the scripts i have. THEREFORE I am asking very politely.

Right... You missed the script names, TDA_ConYard_Repair and TDA_ConYard_Controller?

If you don't have both Scripts.dll files installed in your modification folder's scripts directory, you
won't get them to work.

Im assuming the big scripts.dll and the tiny scripts.dll(that i thought was a dud) When i get home
ill check that TY ACK.

Scripts.dll version 1.2 (www.sourceforge.net/rentools/) should go into a "scripts" folder under your mod folder. A copy of the Westwood studios scripts from the renegade directory (C:\Westwood\Renegde) should be renamed to scripts2.dll and placed in the same folder as the one from Sourceforge.

Please note that if you use the script.dll version 1.2 in a mod you must include credits for the authors of the scripts.dll (Jonathan Wilson, Thomas Anderson (Dante) and NameHunter).
