This C130 Drop Mod adds an EVA announcement when you purchase a vehicle: "Building. Warning: Aircraft approaching; Please clear the runway."
Also you can hear the plane cargo door move and pilot speech when using the Sniper Scope.

Download here:

File has been updated:
-Cargo Plane engine sound plays now correctly.
-Added second drop file that makes Cargo Plane bigger and more detailed.

And remember, as with all C130 Drop mods, the host must have the mod installed to allow clients hear the added speeches and sounds. If the client has the mod but the host doesn't, you don't see any changes.

So your saying if I download this, it just isn't a sound file that I will hear when I play in lets say the FoD server?

Maybe, but it is a nice addition if you play Multiplayer Practice or LAN.

But can't we ask the server owners to install the mod on their servers?
Another thing if you don't have the Wav file copied, you will hear only "Building." and missing the warnings.

BTW, GDI has similar voices for Weapons Factory:
"Building in progress, please standby."
"Warning, Vehicle construction imminent, please clear the zone."
"Construction complete."
Then...
"Unit ready".
