It means you have 2 objects called "cylinder08" in your model. Press "h" and locate one and renme it to something else and then re-export.

Also keep in mind:

Node Names are only 15 Chars long.

That means:

1234567890123456  
is th same as 1234567890123457

also be aware of naming your exportet w3d longer than 15 chars... will cause problems later, means crashes and such.
