Here's a working link to the picture <http://www.n00bstories.com/image.view.php?id=1968065764> .

He is using the Death Adder Color Aimbot, and no he did not create it. It is also not an aimbot, but just a clickbot. It scans for a certain color inside the circle you define, and when it sees it, it sends a mouseclick. It does not AIM for you, thus not an aimbot.

Snipefag is free to use this all he wants, and it's not really an advantage unless he is in a sniper-only server. Games of renegade are not won by snipers or bodycount, rather by destroying the enemy base. You can snipe 100 people and easily still lose.

It's a shame people like this aren't team players, and would rather spend the entire level standing in one spot waiting for some 3 point free infantry to come into their crosshairs.

Maybe in little games.All I play are 52 or bigger if ones up and its pretty rare that the whole base is destroyed.

I just get my sniper and pick people off and Im mvp or close every game.I wouldnt say an aimbot would be useless.You could be killing every enemy sniper or 1k character that comes near you which would get your team lots of points.

The object in Renegade is to destroy the enemy base. It even reminds you of that while the level is loading. Maybe in a 52 player game you can snipe a few hundred infantry and get MVP, but that hardly achieves the objective. I have played in many a game where my team lost because 90% of the team were all snipers, only interested in breaking their kill records...meanwhile they stand right next to a beacon and watch it destroy our barracks or powerplant because they don't want to trade in their precious havoc or sakura for an engineer to save the base.

Snipers do have their place in the game, but most players who play snipers seem to think they are the most important player, and what they are doing is the most benefit to the team, and its just not so.

Sniping is fun, and is best used to take out enemy snipers, supportive engineers/techs, and 1K infantry. Anyone who uses the clickbot and just stands in a tunnel mowing down 3 point soldiers just to see how many kills they can get, sucks IMO.

Hey people i have linked to this site lots in discussions about aimbots yes i made it and yes i am giving info about aimbots, not how to make them or where to get them just info i dont use aimbots as my brother said i am a genuine sniper all the aimbots i have dont work without modding (without skin editing which i cant be aresed to make).

I am currently remaking the site in dreamweaver keep tuned for more info this will include a section i will donate to aimbot hunters where i will post the nick of people who have e-mailed me about getting aimbots.... beware i have warned you...

If you dont like what i am doing, bringing the information to the people then go a sob about it in a corner. As far as i am concerned i am not doing any harm to renegade because i am not the person giving them out.

Aimbots are crap trust me its easier to learn to be a decent sniper than to get a aimbot working and thats the honest truth.

If you want to look at the site go to <http://www.snipefrag.cjb.net>

Ps: Bro thank for sticking up for me i will send you the new site before i put it on the FTP and yes i am trying to get the FTP working.

That may be the object but in a big room its a waste of time bothering. Just get points and win that way. Unless theres no time limit.

Go ahead and flame or stank rush or whatever you want to to get rid of there base. Youll lose from points just about every time.

And even if you did get more points by sniping 20 1K infantry, guess what you and your team still lose when your base goes down

Vegitofunny 700 points is nothing.

Thats funny, considering the average score in a game of Renegade is ~3,000 points. The single action of destroying a bulding is about 1/4th of that.

VegitoAnd as long as we can have one building we win.

Depends if Pedestal beacon is turned on or not, or if point whoring is occuring on that remaining building.

VegitoBut hey afterall from me saying what I did and looking at my rank and how Im in the top 3 just about every game I play.I know nothing right? :rolleyes:

I never said that. If you scroll back up, I even put the word "most" in bold. But since you bring it up, it's easy to be in the top 3. There are usually 1-2 people who are doing the rushes and planting C4 on enemy buildings. Anyone else who isn't just staying in the base and repairing pretty much gets in the top 5.

VegitoYour just as bad as the people in games who dont listen.

Ad Hominem

VegitoBut do what you want.When our team loses do to people who play like idiots like you want to I wont be losing ladder.

LOL. So people who focus on destroying the enemy base (Which is the goal of Renegade), are idiots who lose and snipers are the winning saviors eh? :rolleyes: :rolleyes:

And I put up about 2500 points a game with a sniper. Thats about 4 buildings. And If Im not mvp the person who is is sniping. Just about anyone with a rank of 20 or less only snipers in the big games.

But you do what you want. Im sure youd be mvp always in the games. :rolleyes:

But hey Im rank 13 from doing what I said. And I know for a fact the entire top 8 does exactly what I do but somehow were wrong right? :rolleyes:

BlazerLOL. I have no problem with a site about Renegade aimbots, since none exist except for the death adder clickbot.

I do have a problem with it, personally... because most pages with trainers/relays/aimbots are actually trojan horse viruses containing Sub7 or a variant that adds your computer to someone's bot net... meaning your bandwidth can be used at their leisure to flood others. And that's just the tip of the iceberg.

Yes, in the big game 52 and up such as afterfive or light speed snipers own the field. I mean no helicopters can survive out of their base with out dieing. If your GDI shooting and you have around 10 snipers who spot stanks and start shooting it, and it gives 22 points for each shot inflicted upon it then that's 220 points per each shot if all of them hit it. There are also many engineers and tanks gaurding base so if your team of snipers can each put once clip into an stank thats 880 points your team gets because of those sniper. Guess what you alert your team those stanks come in they die, and your team is up atleast 880 points. If the opposing team does this over and over without any success who wins (GDI). Not to mention if you have good snipers on your team its easy to get atleast 30 kills a game in afterfive, and if you know what your doing you mainly go after other 1000\$ infantry unless a team member needs help ridding of another infantry. That's the importance of snipers in a 52 player game and up. If you look at the top 10 maybe top 20, just

meet them in a game (a big one) and watch how they play they get a sakura havoc right from the start. Though this doesn't work as well in 36 player and below, you must rely on rushing and tanks then.

/wanders off with sniping squadron

I AM NOT GIVING OUT AIMBOTS EVERYONE SO THERE IS NO CHANCE OF YOU GETTING INFESTORED I WOULD NEVER DO THAT CRIMSON, SK8RIMUK I DONT USE OR DISTRIBUTE AIMBOTS !!!!!!!

i am only giving information about them and really people deserve to know the truth that there are aimbots out there but.....

[list]

[\*]have a less than a 3% accuracy which is about 40 % worse than any good sniper !!!

[\*]They Lag you till you cant play anymore with them

[\*]They hit less that 3% when you dont have a skin TC !!!!!

[/list:u]

I am glad that blazer can see my point, as we all know blazer is wise and thinks before he talks unlike certain people "policepolice" \*\*cough cough\*\* who still belives that there are 100 hit ratio

!!!!!!

PS: one last thing, i love it when people accuse me of using aimbots in renegade cause it means i am a good sniper if Sk8rimuk remembers rightly sumone accused me on Jtek the other day.

I have respect for good snipers. But Renegade is not a sniper-based game, and nothing pisses me off more than some sniper guy who watches our base go down because he doesnt want to trade in his Havoc for a hotwire. And usually they have 5K credits too, but instead of buying anything for the team, they are only interested in getting another kill.

Not saying all snipers are n00bs like that, but I have been in many games where the reason we lost was because of nonteam snipers. And usually when the team bitches at them for just watching the beacon countdown they say "I have more kills than you so STFU".

But will I trade in my sniper to heal that beacon?

Depends.

If Im the only one who will get it yes.

If I have money yes.

If theres even a small chance someone else can get it and Im poor I wont.

Building goes down oh well.Ive lost buildings many times and still pulled out he top scorer.

I don't think you would distribute viruses. My point is that if you offer an aimbot for download, you promote downloading files like this from sites on Geo-Shitties, and lull people into a false sense of security about downloading aimbots. Part of your site with information about aimbots should warn people of the danger of trusting these sorts of files on the internet. Some virus scanners don't

even pick these up.

If I have money yes.

If theres even a small chance someone else can get it and Im poor I wont.

Building goes down oh well.Ive lost buildings many times and still pulled out he top scorer.

So what I read from that is:

\* Unless you have enough money to buy another sniper character, you wont trade in your sniper to save the base.

\* Instead of making an effort to save the base and be a team player, you instead leave it up to others, and then probably blame them for the loss.

I cannot count the number of times I have traded in a 1K Mobius/Mendoza, Havoc/Sakura, or PIC Sydney/Raveshaw for a PLAIN ENGINEER (even though I had no money) to save a building. And probably 8 times out of 10, there are sniper chars standing right there that refused to help.

What good is letting the building go down and retaining your sniper character if the building is the PP or base defense?

I WILL continue do what I want, and be a team player. I will continue to trade in whatever character I am for a free engineer to disarm a beacon, and I will continue to get the respect of my teammates, which is worth a lot more to me than bragging that I got the most kills even though we lost.

Vegito Same as your challenge for someone to show you an aimbot blazer.

No, that's quite different. My challenge is a just one. It's a simple fact that there are no working aimbots for Renegade.

It's NOT a fact that being a Sniper in Renegade is more important than anything else. Yes, it's your opinion, and your playstyle. But it's not the best way to play, not how the game is meant to be played.

There is no disputing my challenge. To dispute yours all I have to do is be on the enemy team and make a couple of APC rushes (which you won't disarm because you don't want to trade in your sniper).

Teamwork > SelfishSnipers

Theres no contest. My playing style gets me mvp in half my games and top 3 in the others.

Lets see what yours gets you.

Sigh.

Your this stupid?

I really had some respect for you before now.

In case you havent realized all I play on is 52 or 56 player servers.

Im sure someone will stop your apc rush while I rake up points.

Then what are you gonna do?Nothing.

Play that way and youll lose a nice chunk of ladder cause youll be near the bottom if you team loses.ANd if they win youll get hardly anything.

If my team loses I lose nothing.

If we win I get a few hundred.

VegitoYour this stupid?

I really had some respect for you before now.

Like I care about your respect? I earn my respect from my associates, I'm not going to agree with you just so you will think I'm cool.

VegitoIn case you havent realized all I play on is 52 or 56 player servers.

What's wrong, afraid of a little teamwork or playing in a game that requires skill? Maybe one day you will discover that shooting fish in a barrel is nothing to brag about. When you get tired of giggling as you fire into a crowd of unknowing infantry and want to really try your skill come on over to a teamplay server like ThePits.

VegitoIm sure someone will stop your apc rush while I rake up points.

Yeah just always leave it up to "someone else"...I'm sure you blame "someone else" when your team loses too. Oh wait, I forgot...you don't care about your team losing, just your kill count.

VegitoThen what are you gonna do?Nothing.

There is a myriad of things I can do...they are called tactics. Something which you apparently know nothing about since all you do is stare into your green scope for hours at a time.

VegitoPlay that way and youll lose a nice chunk of ladder cause youll be near the bottom if you team loses.ANd if they win youll get hardly anything.

I don't give a rats ass about ladder points. I'm not in a clan, and I'm not in the game to fanaticize about a number posted on some server. I play for the fun, the challenge, and the teamwork. Win or lose, if my team tried their best then I had fun, unlike you who probably frets for every missed headshot or not breaking your personal kill record.

VegitoIf my team loses I lose nothing.

If we win I get a few hundred.

Yeah you only lose the respect of your teammates because you refused to help defend the base...but no matter to you since you probably hop over to the next 50+ player server to shoot more fish in a barrel...instead of on a dedicated sniper server where types like you belong

It's obvious that you aren't going to debate this logically, so this is my last post in this thread. I'm sure you will come up with some half-hearted retort, but since I won't be reading it, doesn't really matter

policepoliceguys i was playing renegade with my buddy sniperfrig and he was like killing all these people that were coming out of the tunnel in map (under) and i knew there was something fishy going on, and he created the aimbot, but is there any way that we could contact westwood because of this aimbot, and i hate my buddy from now on, his on the ignore list so guys report this to westwood, lets stop fucking cheaters and oh, heres a little proof of that....

CrimsonI don't think you would distribute viruses. My point is that if you offer an aimbot for download, you promote downloading files like this from sites on Geo-Shitties, and lull people into a false sense of security about downloading aimbots. Part of your site with information about aimbots should warn people of the danger of trusting these sorts of files on the internet. Some virus scanners don't even pick these up.

Crimson if you want me to will will put a bit about "most aimbots out there are trojan horses or viruses i would recomend NOT downloading them!!!"

One last thing snipers always have a place in the team as long as there arnt to many of them the tanks would not stand a chance if there is 15 ravesaws running around....

They can cover beacons unlike any other unit can, there are countless times that i have covered a final building beacon with some of my sniper friends killing about 20 normal troops and winning the game for the team

Another thing in ladder shows how well people understand the game although this can be very misleading i myself have been 5th in the rankings before but that only because i was ill for a 6 weeks after coming out of hospital.

a few weeks ago i decided to see how much ladder i could get in a couple of days and i think i managed to get sumthing like 4500.

In conclusion, snipers are needed in the team dont underate there importance i know there has been massive debates about the up and coming new sony game "planetside" (which i would recomend getting if you like renegade (1 problem its pay monthly i am still getting it tho))

Blazer is right: "The object in Renegade is to destroy the enemy base. "

Sniping for more than a couple minutes is like point-whoring with an MRLS-

- 1) it will not win the game for you or your team
  - 2) You could be more valuably used elsewhere.
  - 3) Every time my free character shotts your Sakura, I get points for my team, and when you kill me you get almost nothing.
  - 4) It isn't even really sniping. there is NO leading of your target.
  - 5) While you are busy sniping, I am driving to your refinery with a hotwire.
-

I am sorry but that is actually total rubbish considering you have a different team every game?!

I know from previous games just having a good player in your team is enough to sway things when you have people like Uksrene, C4miner, the list is quote long....

Like today on yokahama base i belive that i (and sum engineer buddies)won the game for the team, the game started and gdi took over the tunnel me and the engies took out all the tanks and secured the field i know its only a camping map but still 1 person can quite easily change the game thats what i like to try to do, i would rather spend a whole game trying to destroy a building than to camp the whole time. (i am not trying to say i never camp tho )

So in conclusion Quote:YOUR RANK DEPENDS ENTIRELY ON HOW GOOD YOUR TEAM IS

Yes..... but you dont have 1 specific team you made it sound like your team followed you where ever you go.

If you dont realise that individuals can influence the games outcome then you must be either a cronic camper or one of those people that sit around all game so they can set of about 20 beacons at the end.

I know they did, they came forward in iRC. The difference between these people and you is you actually took the time to make a website about cheating, no one here did. If you are low enough to make a website to download and run an aimbot, then you're simply pathetic. You care that much to win? Fucking loser. I'm tough about this because it's fucks like you that spend hours trying to edit your files to get the perfect aimbot, I'm not saying that you did, but you did make a website about it. And if the other server admins thought about it long and hard they'd ban you too. I have nothing more to say to you, maybe you should take a LONG look at your life and maybe give me a valid reason for making a website that promotes cheating, and stupidity is not valid. And please don't say I made this months ago when WSE around because the fact is YOU STILL MADE IT.

Your team loses, rank goes down. Team wins, rank goes up.

comprehend? yes? no? maybe? Rank is related to a player's skill AND a player's team's skill in a game. If a player is really good, his team will be that much better overall because of him. You're saying "Your team loses, rank goes down. Team wins, rank goes up" as if a single player has

absolutely no influence whatsoever in the outcome of the game itself. Obviously, that's wrong. The more skilled the player, the more influence he/she has on the outcome of the game on average. Therefore, more skilled players win more often because they help their team out more, and therefore they have higher rank.

SS217snipefragSS217Where can i get this aimbot?

i got the aimbot from WSE (www.westwoodexposed.org) that says enough. Snipefrag, regardless of the fact you use aimbot or not, You're pretty much banned from my server. To even make a website about an aimbot is a violation of trust, you use it or not? I don't know, I don't care

---

either I just lost all trust in you, you don't deserve Renegade, and being I can't take that from you I'm taking one server off your list. Crimson, I have to hand it to you, if I were you this guy would be banned the second I read his first sentence.

I cant say that i am really bothered i am not the one giving out aimbots all i am doing is giving information out about them but if you feel you have to ban me from your server then so be it.

If you wasnt so bold and forth coming about your views and you read the posts i have made you will see that the aimbot doesnt work and if you are saying you would ban everyone who has used this aimbot even if testing it you might end up banning half the n00bstories admin, half the forums, and maybe even a admin of this forum.... I am not trying to give anyone a bad name but seriously lightern up.

If i was giving out aimbots then i would let you slate me but because i am not i dont see why you should be pissed off. Most of the people here have not been irrational with there comments i dont see why you should start :rolleyes:

EDIT: HAHAAHAHAHA you are the host of Jtek i know a few of your moderators who have been in contact with this aimbot, so if your gonna ban me then i guess you will have to ban them.....

O and one last thing this site was made months and months ago when i was still in league with WSE, now those ties are totally broken. Here is a direct copy from the new version of the site i have been making Renegade Aimbot section

"During my wonderfull time playing Renegade i have picked up a lot of "so called" aimbots, after resent controversy i have decided to publish information on all the aimbots that i have found.

Any downloads?

There will be no links to any downloads only pure information so that you can prove that aimbots do exist for renegade to all your friends who dont belive you. If you have any complaints please E-mail me a Chett2001@hotmail.com and i will take into account any suggestions in the sensitive topic.

Hmm can i purswade you?

If you want to try to purswade me to give you an aimbot please E-mail me so i can laugh at you and post your name in a new section called "Aimbot hunters" you have been warned and i will take no responsibility from any hacking, virus's or unprofound flaming that may occur at your inbox as account of my information posting.

The Aimbots

This is finally what i am sure most of you have come here to see, here is a complete list of the aimbots that i have been given.

Blazers Aimbot/Deathadders Aimbot

Autoaim Aimbot

Please beware that most aimbots that are available for download of the internet for renegade are trojans/viruses that will fu\*k up your computer.

I hope you find this info a bit more satisfying

I know they did, they came forward in iRC. The difference between these people and you is you actually took the time to make a website about cheating, no one here did. If you are low enough to make a website to download and run an aimbot, then you're simply pathetic. You care that much to win? Fucking loser. I'm tough about this because it's fucks like you that spend hours trying to edit your files to get the perfect aimbot, I'm not saying that you did, but you did make a website about it. And if the other server admins thought about it long and hard they'd ban you too. I have nothing more to say to you, maybe you should take a LONG look at your life and maybe give me a valid reason for making a website that promotes cheating, and stupidity is not valid. And please don't say I made this months ago when WSE around because the fact is YOU STILL MADE IT.

Get your facts straight i HAVE NEVER offered any downloads about aimbots from my site, IF YOU LOOK at my site the aimbot section is only a small part of it i pride myself of the glitches section which i made ages ago too, I HAVE NEVER edited any aimbot to get them working i literally cut pasted all the information there from WSE.

If you are going to carry on and try to be a self ritious twat and blame someone for a INACURATE site that they made ages ago then you have a pretty sad life.

I have never done anything bad to the renegade community i have allways offered my help when people have needed it about map making and stuff, all the other people here see that the only thing i did wrong was to be in WSE and thats cause i was friends with lurker that is now in the past so you should forget it along with other people.

If you cant forgive all the people that were in WSE then i guess you will have to have to ban people like england and lurk who have totally turned a corner, The fact of the matter is i am only giving information.

If you read people like blazers posts he mentions that he doesnt mind about the site cause it doesnt give any downloads and THE AIMBOT DOESNT EVEN FUCKING WORK NO MATER HOW MUCH YOU "TWEAK IT", crimosn said to me to put a warning about people like mwersefk were putting trojans/viruses in aimbot downloads and i did.

If you want to ban me then so be it, i do enjoy sniping on you server and i have friends who play on there but i guess if your gonna be this way then i will just not play there. It a big loss to me but i guess i can play on a different server that proberbly will lags like fuck. And considering i was just asked to join the clan that is hosted by your server i guess i cant... I am sure he said your server the clans HS (HeAdShOtS)

Lol... This is what happens when you put someone who isn't mature enough in charge of a server.

Good luck Snipefrag.

If you had bothered to go to the server you would've seen that you aren't banned. I took a look at the site and everything a while ago and decided against it, I know I'm very harsh with banning, not as much as I used to be, I just want the server clean of everything that poses a threat to it. For all I known you could've been lying this whole time and went to my server had some site that let you download aimbots with trojans in them, and to be perfectly honest I get one too many newbs and n00bs in my server that would go to that link, and I don't want that. I wouldn't be so harsh if I got a decent crowd that I could trust so I don't have to spend a few hours a day keeping n00bs off my servers with scripts and general kicking, I only have 3-4 moderators to help me, they do a great job, but moderating isn't their job that they get paid for. What I'm trying to say is the safety of my server and the players is what I really care about. And every kick ban I make is in their best interest. Hell, I even had a corrupt moderator that kicked for the dumbest reasons like ping of 300. So yeah, I have to be careful. Though I don't really 100% forgive you for making that site. But it was the past, and that's all it will be, and I have to realize that.

EDIT: Though we all know there are aimbots snipe, gear your site more to the statement every bot

I was ever given either sucked or didn't work so don't bother, or just even delete that page.

Halo38I believe you should all get your facts straight Snipefrag is my brother and he doesn't have an aimbot this is a FAKE my brother is a genuine good sniper yes I have watched him play so shut up fool (policepolice).

policepolice I don't care how well you know him he doesn't use aim/clickbots end off story!!

This is a very very old picture as the s in snipefrag has been a capital S for a long long time now I SHOULD KNOW I CHANGED IT FOR HIM!!!!

---

And Snipefrag is a team player! I have watched him cover numerous beacons on walls flying with a sniper and take out half the buildings on mesa as an apc covering beacons for Ituksrene (or was that C4miner, cant remember)

ONCE AGAIN FOR POLICEPOLICE YOU MONG STOP MAKING UP SHIT ABOUT DECIENT PLAYERS. DICK HEAD :rolleyes:
