sorry if thishasalready been asked :oops: but ah well

I heard somewhere that renguard is gonna be encoded into BR.NET well in that case what happens to the servers that dont run BR.NET? will we have to switch to BR.NET?

DJlaptop i think it was is coding one for the servers running mIRC scripts.. and wot not

or maybe it was scopry.. i cant remember!

some one is sorting that

Yup, it is gonna have functionality WITH BR, But if you don't use BR, it won't affect you. It's optional.

RenGuard compatibility will be built into BR.NET and BRenBot (soon to be released)... and for those who have their own solutions, djlaptop is coding what we call the RenGuard SSC that will run alongside your own apps to handle your anti-cheat needs.
