ok, I've got a problem. the renalert forums are making me mad.

Heres how it used to go...

I had the log in when i return to the site feature turned on, everything went well and work properly.

NOW....

when i return to the site im not logged in, yet the feature is still on. when ever i try to go to a new page from the on im on( Log in screen to Gen. Descussion) i have to re-log in.

whats wrong.....if i am banned i would like to know why because i cant think of anything....my screenname is tweekbee.
