What do you mean an exceptional speed? I am hosting my site from my house with DSL, but we have been having some problems with it being slow lately, we know how to fix it, it's just that we can't find out 1 thing in how to fix the problem . . .

Well the shade of blue kinda makes me puke. Your on the right track but keep in mind you dont have to release everything you make. Wait till you make a skin you really worked hard on before releasing it.

I can't think of anything.
But, it doesn't really take any effort to recolor the skin in PSP with Retouch>Color to Target tool.

I congratulate you on making a red recon bike. Despite the fact that it was already red....

No... when he first posted he said that he made the blue stuff on the bike blue. If you looked at my quote in that post, you would have saw that.

Hue/Saturation for Photoshop.

You can make a red thing into blue in a few seconds with that.
