First of all, I must say that I suck at this game I beat the whole thing on the easiest setting, but I got whomped on in the next difficulty. I've been searching for a couple of days for an unlimited health/ammo mod or trainer for SP, but all I've found was a level skipper trainer and a mod that I couldn't get to work...can anyone help me out?

Thanks

Erm, there are type-in cheats. Enter them in the console.

renegade - God mode

allguns - All weapons

Dunno if they work or not

nah...I heard about both of those, and they don't work. From what I've heard, the only true cheats in the game are the extras...you need a trainer or mod to do any real cheating.

Is it just me or did he already make his intentions perfectly clear?

(And as far as I know you can only use the SP cheat/extra/whatever codes in SP and not in MP.)

You really dint know that you can use the extras cheat in MP?

And no were did he say he would not use it in MP, im not blaming him for anything, just asking a question.

And can you do me a favore and just lay off my back for a while, your really getting anyoing with your posts just trying to find every single flaw in what I say.

He said he was looking for something to help him out in the SP missions. He never once said he even played online, let alone was looking for the cheats to do it there. You jumped to that conclusion yourself. And, for the record, it's not difficult to find flaws in what you say. It's difficult not to find them.

Well...I got it to work, and you can rest assured that I will not use it in MP...for one, I don't have an internet connection at home - I have to put all of my mods and stuff on disc and take it home to use it (really annoying, but it works). For two, I've played online in the past and been cheated against, and I know how superbly infuriating it is. If the day ever arrives when I do start playing MP, I'm not gonna cheat.

LOL. yea id have to agree with dave on this one lol if u start usen a trainer just because its "hard" you will never get any better. Just practice and get skill and beat it with out any help then your getting "trained " instead of letting a trainer do all the work for you.

Yeah, Renegade was one of the easiest games for me, the AI is pretty crappy, they all run in a straight line.....When I first started Ren SP I went on commando, and it didn't seem hard, probably because I got used to that 75/75hp rather than 200/200hp. The only hard thing I saw in Renegade is in some places there were just huge masses of guys that would just seem to keep coming, with limited ammo you just had to shoot and keep running most of the time.

The Golden-God Mod doesn't allow MP play with itself installed.

It this why I'm having so much trouble cycling maps in multiplayer practice?
I've tried editing the skirmish.ini, and I even downloaded a program that's supposed to do it for you, but every time after it loads, there is no ground - I just keep falling and dying and respawning.

(If the Golden God Mod isn't my problem, is there some kind of patch that I need? Any help is appreciated.)
