Hi people. Ive just got back into renegade after 1/2 a year and when i came to reinstalling the game..for some reason...it wouldnt let me install the westwood shared internet components? Ive got a feeling the disk may have gone corrupt so would anyone be able to tell me where to get the renegade internet components? Ive looked all over wol and nothing. Even if someone could send me the shared components via email or if too big then irc or messenger?

Thanks.

You could just try reinstalling them again, how many times did you try?
