you have to change the if_*.w3d files, or the matching .dds files.

Remove the logo with...
http://www.thecodesmith.com/renegade/if_renlogo.zip

Change the background by editing the file called "back.dds".

conman23145what do u do to edit the .dds files?

You have never done this before have you? First go to my computer then double click the drive you installed renegade to, now find where you installed Renegade to and go into data files. Once you are in the Renegade data files delete the alway.dat. Now STFU and go away because you have never done this before so don't say you have.

spreegemconman23145what do u do to edit the .dds files?
BTW you might want to get the always.dat back

dont say that!!
