Hi,
I run [UN] Default Maps & [UN] Renmaps.cjb.net
I was just wondering why people join when a regular map is playing but refuse to download newer maps? Are you not tired of playing the same old stuff?

The server is on WOLSPY so both gsa and wol can play at same time. Anyway if you see it running (hours are 4:30pm-7:30am weekdays & all day weekends) please join it. Also you can download the maps: http://renmaps.cjb.net it is monitored so we catch cheaters/trouble makers.

thnx.
