I see 3 main servers running it and they never update gsa status... ocassionaly it works properly, and you see the messages on the log screen: "routine memory clean up, served XXX gamespy requests" but that rarely happens... when its working properly everythin is cool...But thats rare or I can't get it to do that...

Anyone know what to do?[/u]

Wow that wasn't helpful at all!

People use Gamespy because there are alot less n00bs and cheaters.

But WOLspy has had this problem for a long time, and nobody seems to be able to fix it.

I've been playing Renegade long enough to know about the two WOL vs GSA matches. WOL beat the hell out GSA each time. It wasn't just two games it was two matches, so there were several games. And if I recall correctly GSA did not win a single one.

I understand why people would think GSA players are better though. Most people who play on GSA know what they're doing so it seems like they're better. So then all the people who aren't so good play on WOL. But when it come down to the best players of GSA vs. the best players of WOL, WOL wins everytime.

Yeah, ok... seriously... It's logic. I didn't ban any fucking "ta" players. I banned a [gse] player and a K4T player. Not for being too good, but for BREAKING THE RULES and for disrespecting me, respectively.

Anyway my post wasn't entirely directed towards you, but in general to those who think wol players are better than GSA, they aren't. As for banning gse for breaking the rules, that was lame, you should have kicked them. I have seen plenty of players on n00bstroies breaking rules, e.g. stealing tanks and they rarely even get kicked much less banned.

face it, you banned them more because you were sick of them winning then when they started talking shit.

Crimson

Do not post in discussions in which you have no frame of reference or CLUE what's going on.

what do you mean by this?

I posted 2 things which I backed up in this thread, both in which you had a problem with and were wrong.

1, I said ack doesn't give credit to original westwood map makers (with the exception to the glaiocer map) To prove this, download any westwood map from cncdecn.com e.g. metro, bunkers, e.t.c. and you see it says the sole creater is ack.

2, I think you banned gse because they were kicking too much ass, and you kicked them because your highness got all pissy, a kick would have been in order,; but your a pretty shitty moderator if you ban based on "crimson makes rules so that you can hit her" please... you must be a total n00b if you think you have to prove to anyone that, this isn't true, and banning the person who said this doesn't make your case any better.

I run a server as well, people talk shit to me all the time, I dont' ban them or kick them. If they break the rules, like steal a tank I'll kick them.

The following are the official rules for the "n00bsvr01" server. If anyone wishes to play on said server, please make sure you know these rules like the back of your hand. (If, for some reason, you have never become aquatinted with the back of your hand, please give it a glance now. In fact, take a picture of it and place it next to your computer screen. Glance at it once an hour.)

Allowed Characters/Vehicles: It's all out war, so no units are disallowed.

Swearing: I do not mind swearing, but certain racial slurs do not have any place in any discussion. If your language is found to be excessively abusive, you will be given one warning, followed by a ban from the server.

Abuse/Being a pain: Any player seen being excessively rude and/or annoying to any player may find themselves kicked from the server. This includes complaining about lag, complaining about the way the server is run, or complaining that people are "pointwhoring".

Map Bugs: Every server has different policies on which bugs to allow and which not.

patch of grass directly outside the GDI base is considered a Base-to-Base from.

of base defences is allowed.

give you a leg-up over a wall in real life. The only case where this is not tolerated is where it is used to get onto places you are not supposed to be, I.E. The roof or the Refinery on non-flying maps.

Point Whoring: Yes, we all hate it. But, if you cannot get the man-power out to kill "That darned MRLS hitting your Refinery, I'd say your cause is pretty much lost.

Harvy Blocking: Prohibited. Don't block it or you'll be kicked.

Shooting through the WF glass: Prohibited. Don't do it or you'll be kicked.

Moderators: We all have days where we don't agree with moderating decisions. However, please trust the moderators decisions, as I have placed my trust in them to do a damn fine job. Especially that DaveGMM guy. He's the best.

By playing on my server, you agree to these rules.

Rules RIGHT ON n00bstories. Notice the WF Glass is right on there, and it has been on there for a long time. How is that changing the rules? If we charge a person with treason they will not say

"Nuh uh! You made that up just now you l00ser... Your government are such n00bs just cause I Owned some intelligence important to national security and gave it to the bad dudes. Stupid country can't stand being Owned" No I'm pretty sure that's been in the declaration of independence, oh... I'm sure at least a FEW years...

I kicked hot_rod (not gse the whole fucking clan, get your facts straight) for breaking the rules. I banned him for being an asshole after the fact.

Let me state this, AGAIN. I suck at Renegade. OK, I don't suck, but I'm not great. I would classify myself as "pretty good" at the game. There are a LOT of people who could and do own me, and I certainly don't ban them all.

And regarding ACK, you can pull readmes out of your ass but it doesn't change the fact that Westwood TOLD ACK that he can do whatever he wants with the files, even claim they are solely his own work. But he didn't. He gives credit to the original concept designers. But none of that changes the fact that you don't see Westwood or EA suing his ass and people get to play maps that would never have been released without ACK's help.

true, you still broke your own rule, you banned instead of kicked, also how did you ban him after you kicked him?

Crimson

Ok, if its well known that Ack has westwood persmission, then its also well known ack made the maps. So why the hell does ack always bitch about readmes? Why does he always think if a server is using his maps, then the server must be taking credit for the map. Ack just like to bitch for no reason, he thinks people will claim they made maps released by him, I have yet to see any

incident of this. The fact is the only one taking credit for other people's work is ACK himself, not the other way around. I just wanted to point this out so he would stfu about "taking credit for my maps"

Lame comparison, taken completely out of context because you're unable to grasp what I really mean.

I own Crimson at Renegade whenever I play against her. Usually, when I kill her, she says something like "I can't believe I gave you the hardware that allows you to do that to me."

Now you are picking at semantics. I had intended to kick him, but the kick failed because I wasn't specific enough (I tried "hot" and "rod" but neither were unique at the time)... so after his comments, kick became ban. My server, I don't want him on it. The thing's full like almost 24/7, so someone who isn't an asshole can take his spot.

Something interesting I found while browsing forums...

Quote: You know what? I have to admit I was wrong! The Licence agreement DOES mention server bans.

Quote:

5. APPROPRIATE GAME PLAY; RESPONSIBILITY FOR GAME PLAY. You agree to not take any action or pass any communication, either in or through the Product, that interferes with

inappropriate. Without limiting the generality of the foregoing, examples of unacceptable behavior include harassing, threatening, embarrassing or intimidating another player or person or entity, transmitting any unlawful, harmful, threatening, abusive, profane, offensive, obscene, harassing, defamatory, vulgar or hateful communication or material, or any racially, ethnically or otherwise objectionable communication or material; impersonating another person or entity, including, without limitation, an EA or Westwood employee or representative, an employee or representative of the operator of the server, another player or an information provider; disparaging the Product, EA, Westwood or any of their representatives or employees, the server operator or its

representatives or employees, any other player or any other person or entity; and, intentionally or unintentionally violating any applicable local, state, national or international law, regulation or treaty. You are completely and solely liable for all communications and other activities of every kind and nature conducted by or through your screen name/log-in name.

Yes, I acknowledge that the bolded text can be used in more than one way, so don't bother to point it out, as it CAN be used both in favor of being allowed to ban, and in favor of not being allowed to ban.

Quote:

6. LOSS OF PRIVILEGES. In the event that you engage in conduct prohibited by this License, or otherwise commit any other breach of this License, then one or more of the following may occur:

off; use of your account may be temporarily or permanently blocked; and your use of any other on-line gaming or other similar account that you then or may in the future maintain with the operator of the server, EA or Westwood or their respective affiliates may be temporarily or permanently blocked.

This here states however, that if you "engage in conduct prohibited by this License" The server owner may "temporarily or permanently" block you from accessing the server.

Just to highlight the important parts:

Quote:You agree to not take any action or pass any communication, either in or through the objectionable or inappropriate. Without limiting the generality of the foregoing, examples of unacceptable behavior include harassing, threatening, embarrassing or intimidating another player or person or entity, transmitting any unlawful, harmful, threatening, abusive, profane, offensive, obscene, harassing, defamatory, vulgar or hateful communication or material, or any racially, ethnically or otherwise objectionable communication or material

This means that a server owner can ban you simply for saying "the host sucks" as it can be deemed harassment.

Alright you bunch of whinny little annoyances *Alkaline cough cough*

Here's how I see it. Alkaline you seem to have a problem with authority. Crimson owns the server and she dictates who is banned/kicked whatever. If she so desired she could ban a person for no reason at all and give no explanation, and there's not a damn thing anybody could do about it. However, she appears to try to set the rules to make the game as fun as it can be. If you don't like the rules then the best thing to do is to play in another server. If you thing someone was

unjustly banned then try to reason, and even if the moderator still doesn't see it your way you might consider asking for a second chance.

It seems to me, though, that you're only here to start a fight.
