Yeah, so, last night I was playing in n00bsvr01 and these two guys [gse]hot_rod and nuclearfusion|k4t (something like that) decided they were dipshits.

First map: City Flying

I joined in this map. I didn't get a chance to do anything before it ended, but these two guys did pretty well on the map at the end.

Second map: Volcano

I was on GDI and we got spanked. No complaints about lag from anyone.

Third map: Canyon

We had a couple mobarts and our friend NuclearFusion was on GDI. We kept owning his tanks and the rest of GDI's tanks with our mobarts, and every time it was "lag" "lag" "lag"... so I told him "You didn't have a problem with lag when you were winning"... his reply "Yeah, it just started".

Right, buddy...

Fourth map: Mesa

There two were on Nod. I tried in vain to hold the middle and we were left with two, maybe 3 mobarts pounding on the WF, and I happened to notice an unannounced light tank hitting the PP from the side. I alerted the team and several people came over to help, but they took it out. The game didn't last long after that... When we were down to just the WF, [gse]hot_rod decided he wanted to break my server rules and shoot through the WF glass. I ran into that room to see who it was in there and was instantly killed but at least I had my rule-breaker in the kill message. I tried to qkick "hot" and "rod" but both weren't unique enough. Before I could finish, the map ended.

Fifth map: Islands

hot_rod decides to call me "newb crimson who can't handle getting ownt", that my rules are "not to kill crimson", and Nuclear says I "change the rules to suit myself". Blazer banned them before they could get any further.

So, a message.

Ever since the server was brought online, it has been forbidden to shoot through the WF glass. I changed nothing. I didn't complain about being killed while he broke the rules, either. Nor did I complain the other times I died.

FOLLOW THE FUCKING RULES, guys... they are posted on my website. I only disallow exploits that favor one team over the other. Period. GDI doesn't have any glass to shoot into a building through, so Nod shouldn't, either.

Sometimes, there literally IS lag on the server.

I remember one time I had the pleasure of playing a map where literally EVERYONE was "rubberbanding", and when I say everyone, I mean everyone was complaining about it.

Normally, I'll give you, it's fine, and the people who use it are using it as the lameoid excuse it has become associated with.

I'm sorry if I sound like Joe Normal, but just occasionally they're right.

1. I don't really understand this rule. Could you explain it with more details? What do you mean by WF glass? The glass that is inside the Weapons factory and shooting through it, or what?

Few more questions:

2. What is the obelisk "glitching"? Is it when you walk backwards toward the obelisk and it will not shoot?

3. What is "Base-to-Basing" (on the field map)?

Well that is it. Those rules are a bit hard to understand.

Those are all correct.

B2B on field is done by shooting from the GDI base, and shooting the Nod ref.

1. I don't really understand this rule. Could you explain it with more details? What do you mean by WF glass? The glass that is inside the Weapons factory and shooting through it, or what?

Shooting anything through the glass in the "garage" of the WF. For some reason it's not treated like normal glass and you can shoot directly at the PT for major damage. You also usually kill the engies inside way too easily. Like the one-hit kill like was done on me.

Quote:Few more questions:

2. What is the obelisk "glitching"? Is it when you walk backwards toward the obelisk and it will not shoot?

I don't think that works as well as it used to anymore... we are referring to standing on top of the hill on Hourglass where the obelisk shoots you but you don't die. This is usually done to distract the obelisk from shooting an incoming rush.

Quote:

3. What is "Base-to-Basing" (on the field map)?

Well that is it. Those rules are a bit hard to understand.

There's a spot in the mountains and a way to position an MRLS to shoot through the mountains into the ref. Others can shoot even more than just one building.

Why does everyone bitch so much about lag? It's part of playing on the Internet so you'll have to live with it.

Yes, lag is a pain-in-the-arse, but what does it matter? It's obvious that they're complaining because they got "owned" and don't want to admit it.

I've put up with loads of crap from lag (being a 56K player). But I don't really care if I get killed so often or can't do so well in a game. If you get so upset over not winning or can't bare losing, then you have a problem.

I agree that it's annoying when people say "lag kill" or something similar after being killed. Even though I've been "lag killed" many times, but don't really care enough to say anything.

not to sound like a pain here, but lately there was been a lot of "lag kills", like where you run around a corner and then you die. What you see on your screen is not what they see on their screen sumtimes, and they go all n00b on you say that your cheating cause you shot them around a corner. I was also in some games where the SFPS shot down to as low as 9, and stayed there =\

"ownt". I can handle getting owned, lord knows I'm used to it because I'm not the best or even one of the best players out there, and I've always admitted that...

If I pay \$\$\$ each month to host a server, I'm not going to WASTE that money on people who won't play by a few SIMPLE rules such as not exploiting map bugs and I'm not going to waste my money on people who call me names and treat me like shit. No, I'm not going to spiral into depression because you think I'm a nerd (oh no!!), but I will remove you. End of Story. That server is full almost 24/7... For those who didn't know, they talk shit wherever they go, and whatever they do.

It is to be expected from any [gse].

And it is common sense not to rudely announce to the owner of a server that they got "ownt", with ownt not being a word.

And for anyone, esp. any [gse] who wants to disagree with me at all...

If I had a sig with a dozen different things in it, pictures of cars etc it would be large too. But by definition a sig is supposed to be brief and concise.

I'm not picking on you, I'm just stating one of the very few common sense guidelines that are posted in the forum FAQ/rules that have been posted since day one.

<http://www.renforums.com/viewtopic.php?t=19>

"Just keep in mind that by definition a "signature" is a small signoff message. Anything larger than 3-4 lines of text stops becoming a sig and turns into 'that big picture at the end of the post'."

Just a few of your posts with that huge sig in a thread makes everyone have to scroll dozens of lines more than they normally would. I agree the picture is amusing but there are many large pictures that are amusing and we don't all put them in our sigs. You could resize it or put a link to it in your sig.

Nod usually will get a soldier or buggy to be close to the doors so they stay open, and a mobart or sakura will fire inside, killing all the helpless engineers and hotwires who have their backs turned. There is no similar building on Nod that lets gdi directly hit the MCT with vehicles, thus it's an unfair advantage, not to mention almost impossible to defend against. I did have a bad day, I had to put up with a bunch of crap and being the nice person that I am 99.99% of the time I just put up with it, so at some point I get tired of people taking advantage of my niceness and not taking me seriously

Hey man that happens. Had some things myself like that. Your decision was understood, but really shouldn't let stress get to you.

warrantomrpiratewarrantoAs fot the GSA being better than WOL, does anyone still have a link to the WOL vs GSA game that was played before Crimson took over the forums? I need a refresher, who won that game again?

Hate to get involved, but gse is one damn good clan.

GSA (GameSpy Arcade), not GSE. There was a game played over a year ago between WOL and GSA, and WOL won. Hence WOL has won the rights to rebuttal others saying that the people on Gamespy are better than the people on WOL.

And I can see how that would still be valid, since the players on both sides would still be the same. Back to to the point: I'm not blind or retarded, I know you were talking about GSA, but the thread was about a player from gse, so I thought it was worth mentioning that gse is a great clan.

Blazer

Nod usually will get a soldier or buggy to be close to the doors so they stay open, and a mobart or sakura will fire inside, killing all the helpless engineers and hotwires who have their backs turned. There is no similar building on Nod that lets gdi directly hit the MCT with vehicles, thus its an unfair advantage, not to mention almost impossible to defend against. The next time it happens to you (and it will) lets see how happy you are about it

Acctually, not trying to be a jackass or anything and prove you wrong.

But GDI can do it too, not as easily but it can be done.

Two what? the HoN.

I think you can even do it on City_flying with a MRLS.

But usually its done on flying maps, and not a lot of people know how to do it, but i've seen it done in big servers a few times.

What you do is, you get an Orca, go to the back window of the HoN and just start shooting the MCT through there, of course this works on Flying maps only, but on some maps, you can do it with an MRLS.

You just simply get int he right position, and you can hit it.

Of course i don't see it done so much one public servers, acctually i've only seen it done about three.

=/

You can also take out an orca in <10 seconds even with a minigunner, but when there is a mobart with techs repairing it, along with stealth and light tanks outside the WF GDI is helpless. You cannot appreciate the cheapness of this tactic until you have had it happen to you

They are a bunch of assholes if you ask me. I don't have a problem with any other clan in the world, just gse.

And yea WOL won bragging rights, but I didn't even know of either of the GSA vs WOL matches. For all I know a bunch of gse n00bs might have played and made all of GSA look bad.

lol, sorry. I didn't mean to suggest you were incompetant. I just wanted to clarify something I thought was an error in reading what I typed. Misreading one letter is not uncommon (I do it more often than I would like to admit).

Contact me on GSA blazer / Iron-Fart and round up the best of WoL, then we can arrange a little war, afterwards i will come here to brag to you in person.. Hows that sound? (though i know what the answer will be)^^^ It doesnt matter if you hate us, aslong as you fear us

Ps. I know you wont play us but here goes, we have beaten every top clan on WoL easily enough so anyone on these forums can take up the challenge, simply message [gse]Fulgore_xvii on GSA, thx i hope thats cleared the n00b part of the argument up

They do have a few respectable members, but also a few jackasses. How loud mouth kid like Hot_Rod got in is almost mind-boggling and it sure didn't make them more respectable as a whole.

I dont mean to sound smart or anything but you can actually defend against a stank/Sakura in the weapons bay if you have 350 buy a humvee and it will kill the stank/sakura or if you have a stank in your weapond someone should have a proto and dont just stand still. Standing Still=Death

If you have played longer then 5-6 months you have had most everything happen with glitches etc.

O and BTW Fulg III be happy to play in the WOL vs GSA talk to me in Ts2

But yeah you can defend against mostly any attacks. I mean so if GDI cant do something nod can its outlawwed? GDI dosent have Stealths are they outlawwed on the server? I mean this is just why i dont play on those kinds of servers.If hot rod was in smokers lounge and did it im sure he wouldnt get kicked even if it happened to our admin/admins. It is a quick tactic to kill engies so i dont really see the prob but thats my humble opinon

It's not a TACTIC, it's a BUG. That glass is supposed to be unbreakable which means it's supposed to act like a wall. Stealth for Nod is built into the game and intended. Apples to oranges, dude.

Glass is breakable in real life, why not in ren?
Or it must be bulletproof off course.

Okay enough. We arent talking about someone standing IN the WF bay, as you said you can just buy a vehicle and take care of that, we are talking about someone making the doors stay open while people standing in the grassy area fire inside the WF, either with mobile artillery or snipers, either directly hitting the MCT for max damage or just keeping anyone from being able to repair. On no other map can you be killed while repairing your MCT, there is always some sort of cover, so on this one level, this map exploit is NOT ALLOWED. This rule has been posted and advertised from Day 1 on the site (http://www.n00bstories.com/server_n00bsvr01.php). If you don't like it play somewhere else. If you get caught doing it, mods have every right to kick you, and if you are like HotRod and then also insult the server owner then you might get banned as well.

Again, the only reason HotRod was kicked was for breaking the rule, NOT because he killed the host. If she had spawned in the weapons and seen it happen to others, or even if she had been on the Nod team and saw them doing it, the same thing would have happened.

Now since certain people can't seem to understand this simpleness of following posted rules, or that you shouldn't spam threads with stupid pictures, I am lock this as of now.

Have a nice day
