Yes that IS strange looking. It's like a odd blue m00n rover from that pic. With a canopy instead of being a convertible. It could be like a replacement for the buggy if its fast or the stealth tank if its... stealth, in some weird future funky mod. Only think I'd say is the detail on the side of the wheels. It looks quite odd. Add a rim of some kind, and if your feeling ambitious, 26's.

It's, um, really strange. Are you going to put some kind of weapon on it?

ur rite that is strange, looks like a fusion of the stealth tank and nod buggy. add some recon bike rockets on the side and ull have a fusion of 3 nod units to creat a new twist.

looks like a wack mo0n buggy, or a spider tank You could make it a Terror Drone, if it were smaller and super fast and could destroy vehicles in three shots from up close. Hey, that's a good idea Someone make one NOW!

you could make it really weak but fast, so base defenses could Pwnt it, but tanks and soldier would have a hard time getting a bullet into it. Like make it 10 health or something
