Make sure you use "LFDS" and not just LFDS in the config file.

Yepp LFDS should it be.

in 1.30 you used "LFDS" but in 1.31 you only use LFDS

When i just use LFDS i get:  
Starting up renrem thread...  
BRenBot 1.31 linux.  
brenbot is Copyright 2003-2004 by Daniel Herda & Charles Jones. All Rights reserved.  
Fatal Error: Primary IP not found!

When i use "LFDS" i get:

BotMode must be either LFDS or WIN32!

My config looks like this:

```
#--Start Configuration-IRC-----
# Edit the information below for your setup.
# At least edit BotName and IrcChannel.
BotName = Renegade
BotFullName = BlazeRegulator/BRenBot 1.30
IrcServer = irc.undernet.org
IrcPort = 6667
IrcChannel = #Globe
#---Q/NickServ-----
# Enable auth via "Q" or "NickServ" below. Sample input is shown.
Qauth = 0
Qusername = RenBot01
Qpassword = mypassword
# Note for NickServ auth you give the name of nickserv and the full ident string as example
NickServauth = 0
NickServname = NickServ
NickServauth = identify RenBot01 mypassword
#--Windows or Linux-----
# BotMode MUST be "WIN32" for windows servers, or "LFDS" for Linux servers.
BotMode = LFDS
#--Remote Admin Settings-----
# The next 3 lines should be the same info that is in your server.ini
# Note: Although it says "Linux" its the same for Win32
RenRemLinuxHost = 127.0.0.1
RenRemLinuxPort = 4853
RenRemLinuxPassword = *****
#--FDS Installation-----
# Verify these paths are correct with your Renegade installation.
# Note: FDSLogFilePath must end with the trailing slash (as example below)!!
# Note: Linux users use forward slashes (/) in your paths.
FDSConfigFile = /home/games/Server/data/svrfg_cnc.ini
FDSLogFilePath = /home/games/Server/
#--Miscellaneous Settings-----
# Every x minutes the bot will announce a random line from AutoAnnounceFile.
AutoAnnounceInterval = 600
# LadderLookup currently not working. Do not turn it on or it will hang the bot.
EnableLadderLookup = 0
# Set this to 0 or anything but 1 to disable voting.
VotingEnabled = 1
# How long people get to place votes. Default here is 60 seconds.
VotingPeriod = 60
# Set vehicle kick to 1 for Sniper servers
VehicleKick = 0
#--BR Configuration Files-----
```

BR Config Files - You shouldn't have to change these names. You can still open them with notepad.

AutoAnnounceFile = autoannounce.brf

Messagesfile = messages.brf

AdminsFile = admins.brf

MastersFile = masters.brf

KickLogFile = kicklog.brf

BanLogfile = banlog.brf

#--End Configuration-----

BR Config Files - You shouldn't have to change these names. You can still open them with notepad.

AutoAnnounceFile = autoannounce.brf

Messagesfile = messages.brf

AdminsFile = admins.brf

MastersFile = masters.brf

KickLogFile = kicklog.brf

BanLogfile = banlog.brf

#--End Configuration-----

Check if /sbin/ifconfig is executable by your brenbot user. brenbot calls this to find out the primary ip.
