Hi, I'm following ACK's map tutorial. I'm having a problem with the Airstrip and WF waypaths. It says to change the waypath to "Two Way" but I can't find the window where I'm supposed to set the option.

Any help would be appreciated.

Thanks.

Doubleclick one of the Tetraeders of the waypaths (a waypoint) and you'll find that option in the last Tab.

LaeubiDoubleclick one of the Tetraeders of the waypaths (a waypoint) and you'll find that option in the last Tab.

Thanks a lot! Worked Great
