Anyone know what the eta is on the next version of brenbot?
please no smart ass comments like "when its done"

Unknown. As far as I am concerned, there is no active development because RenGuard takes priority. We didn't want to delay brenbot anymore because of RenGuard.

Blazer wanted to work on bringing the LFDS to WOL though a new module, and I wanted to finish my wolspy clone based on the module gamespy_players .. but that's all future talk.

plz. finish your wolspy clone! rengaurd can wait..lol...
anyway best of luck, server owners will be waiting for the new release .
