When i got home from work just now, i noticed the !nextmap dont work anymore for some unknown reason :S

<FanMapsBot> Runtime Error: Can't use string (") as a HASH ref while "strict refs" in use at script/brenbot-131.pl line 4468.

-???-

Btw, may i have access to the Server Owners area?

Happens when it can't find the next map. When running a voted/manually set map, it won't be able to find the next map. It's a known issue.

hmm..., strange.. i have voting disabled and never touched the .ini, its the same ini i used with BR 1.3 hmz.. brb

back. i renamed the ini and now it works.. (??)

The onyl 3 minor probs i got now are:  
!maplist  
!setnextmap  
and may i have access to this Server Owner area?
