seems to be working on my server. Updates every 5 mins. Also don't minimize wolspy to sys tray.
Not sure that it makes a difference or not, but better to be safe than sorry heh.

Crimson, run it when you get the chance.

All Wolspy servers should run this! Otherwise the gsa status will not show up correctly!

So let me get this right, now this fix will allow both GSA and WOL players to be counted in the
WOL list...?

If yes, yey! Finally, was getting annoying!

If no, awww, what then?

No, this fix will allow the correct number of people to show up on gamespy as well as what is
being played. For the WOL listiing, people can click the server, it shows how many people are
actually playing. but ON gsa there is no way to do this.

Currently, WOLSPy doesn't update gsa status, so on gamespy what it will basically show the

same map for the whole time as well as the same number of people on the server, the gsa status will not change! So people have no idea what map is really being played or how many people are playing it.

Alkaline,

Do you have the source for WOLSpy, would it be possible to download it from somewhere ?

Thanks,
Gib

Updated it to version 1.1
More stable and restart time is much quicker:
