Hey guys, just redid some of the code for the wol stats images, now they are much better then before, smaller, more compact, and awaiting user submissions for graphics.

Please either email any 400x45 image suggestions that you have (preferebly easy to port the same text alignment up to) to dante@renevo.com

Here is a sample of the images.

would you guys like to see the kills and deaths squeezed next to the wins and losses, i am sure i could fit them in there?

or would you rather have kills deaths then wins and losses?

I definitely would like to see it, and I would like them EA bastards to fix the ladders so they would work

are you playing on ladder servers, or are you always on the losing team?

from the looks of your rank, and I could probably verify from your online stats, you play small and large server, win on the smaller ladder server, and have the bad luck of losing on the larger ones.

lol, I play in ladder servers, The n00bstories servers and my clan EoE's servers and that's it. It switches wins and losses but I don't lose lots of points because usually in high rank on my team. NOTHING has moved for me at all, I should have a WAY more kills than deaths, way more ladder points, and a rank worth a crap, it just isn't moving

Yea but you see those wins losses, ladder points, and k/d ratio is not my stats. Those are 3 weeks or more old. It hasnt changed, no nothing.
