in wol mode recently I have been getting more of these and have to wait 5 minutes before re-starting the server... Has anyone seen an increase of these errors?

I have noticed a pattern on my server, this only seems to happen when the server is started for the first time after a long delay.

Hence I start the server see one crash about 5 minutes in then my server stays up for days. (I normally shut it down on Monday, because I use the connection for "real" paid work then).

hrm I'll try making it unladdered see what happens.

oh wait then:

n00bs will use extras

people that care about the rank (which doens't work) won't join...

N00bs who use quick match instead of checking the pings won't join.

People (who aren't noobs), know that the ranks don't work and will still join.

Win-win in my book.
