That looks quite good.

But to make it a little better you could load that onto Photoshop and lighten up those dark patches a little, so when it repeats in a map, it won't be so obvious that it is repeating.

What resolution is the TGA file?

its 255X255 and if you use it you can edit it any way you want.

Make more, lots more!

I have seen stuff much worse then that on the internet and the people where trying to sell it...

AprimeWtf...That doesn't even look like real grass...I have doubts.

It was taken from a top down view from what it looks like, so I think it is real grass. . .

Oh, no wonder why.

Haha.
Rework on the colors

Yeah but if someone wants to use it they can do that. im working on a other texture now.

Here is the new one

The first thing that comes to mind when I see it is the grass texture used in Halo. (Specifically, on Blood Gultch)

Probably just because the blades of grass are easily recognizable, as opposed to those in Renegade.

find other surfaces to convert into textures. roads, sidewalks, driveways, sand, dirt, mud, gravel, anything else

You can never have enough roads ^_^

Seroulsy, there is a general lacking of good roads out there...
