After a while of playing games like renegade, freelancer. they really jump, or in large games of renegade
This happens after about 2 hours of playing. To fix this i have to reboot.

these are my specs: p4 1.3 , 640mb RDRAM, ati radeon 9600pro DDR, 100Gig of harddrive space, windows Me.

sterpshow about windows 98se?
Get 3.1, 95, 98, 2000, XP linux! Me is a shitty OS

I recommend XP for gaming. But if you can't get XP, go for 2000.

Discribe your problem better!!

Ive run al OS's so i know a big deal of it...
(yes, i dont know everything!)

What you might try (only for 2000 and XP):

Set your pagefile.sys to another drive, if the drive that hold this is full your can get crashes or other weird messages. Normally this file should NOT be on your sys partition!

Recommended Filesize:

Minimum: System Ram + 11Mb

Maximum : System Ram +/- 256Mb

Good Luck,

Timoos.

win Me=not good, i got a Geforce 128ultra, didnt work on WinMe,
so i got Win2000pro and it worked perfect (it a great video card)
