can i use brenbot whitout a fds serial?

if i can, can someone help me set it up?

caus i dont have anny experiance whit it @ all

THx in advance:)

---

No. The bot is made to regulate the FDS, and the FDS will not work without an FDS serial.

Yes, if you run the FDS on gayspy.

its for wol

but i maneged to get a serial

and i can fire up a server but i cant fire up brenbot :S

this is what brenbot askses from me:

Quote:# The next 3 lines should be the same info that is in your server.ini

# Note: Although it says "Linux" its the same for Win32

---

```
RenRemLinuxHost =
RenRemLinuxPort =
RenRemLinuxPassword =
```

but if i look in the server.ini it say's this:

Quote:

```
AllowRemoteAdmin = false
```

```
RemoteAdminPassword =
```

```
RemoteAdminIP =
```

```
RemoteAdminPort =
```

so what do i fill in... nothing?

-----  
btw is this right 2?

Quote:#--Start Configuration-IRC-----

```
# Edit the information below for your setup.
```

```
# At least edit BotName and IrcChannel.
```

```
BotName = PhxSnpSrv
```

```
BotFullName = BlazeRegulator/BRenBot 1.30 Win32
```

```
IrcServer = irc.zirc.org
```

```
IrcPort = 6660-6669
```

```
IrcChannel = #Phoenix
```

```
#---Q/NickServ-----
```

```
# Enable auth via "Q" or "NickServ" below. Sample input is shown.
```

```
Qauth = lots of numbers
```

```
Qusername = PhxSnpSrv
```

```
Qpassword = *****
```

```
# Note for NickServ auth you give the name of nickserv and the full ident string as example
```

```
NickServAuth = 1
```

```
NickServName = PHxSnpsrv
```

```
NickServAuth = identify PHxSnpsrv *****
```

```
#--Windows or Linux-----
```

```
# BotMode MUST be "WIN32" for windows servers, or "LFDS" for Linux servers.
```

```
BotMode = WIN32
```

---

```
port= anything (7001)
```

```
remotehost= 127.0.0.1
```

```
remotepassword= whatever pass you want (match it in server.ini)
```

in server.ini be sure to leave remoteip= blank

i got it connecting to mirc and to wol

if i leave the renrem setings to default  
but if i change them to other ports brenbot crashes

and none of the commands work not even the kick thing for sniper servers  
but i think that has to be the prob i have whit the ports

anny suggestions?

in server.ini leave IP blank and sync the pass and port with the ones set in brenbot.cfg file

hmm it wasnt that  
but i figured it out  
my pass had numbers in it (dunno if this is a godd thing but when i changed it it went better)

and the ports i used didnt go whit me pc

4848 seems to work fine tho

its a 10 player server it I be online when im gone (mostly saterdag)  
its a sniping server [il change that now and then]  
its on wol euro its caled PHxSnpSrv whit the game name -Phoenix- Sniper Server joint anny time

thx for the help
