Don't RenAlert fan levels need to be submitted to the RenAlert Dev team for approval and patching. If I remember correctly, the reason for this is to prevent from having dozens of sub-par levels in circulation for RenAlert.

I could be wrong though...

The tools were released so that people could play what they wanted to and make what they wanted in the game.

They were not made for the sole purpose of us having to judge your work. If we want your work in a patch, we'll add it with your consent.

Ah i know the problem now. I got a e-mail from the server that says :

Hi HI....

bllaaabllaaabllaaa

and don't use the site as a place to put your files that is not in use in the website. bllaaabllaaabllaaa

bye bye.

I just uploaded the files. Not the index.HTML. so they thought i putted files there without using the website. My website was on another server and the file on another. so i will put the index.HTML in the both server so they don't think im using the there server for just files. BTW its 24 hours shutted down.

and i have tested the link. Just wanted to be shure if it worked.
