Server Stats?

Expected Server Lifetime?

of Players?

provide those, and if they are fitting, i may give up one of my (not telling how many) FDS serial numbers.

Name = Warxserv (unless anyone things of a better nick-name)

I would even be happy to put it as n00bsrvr07.

Server type = Sniper Server.

Expected Server Lifetime = I have no idea, as long as possible.

Players = 8 or more.

Runs on a 2mb connection.

That enough?

lol, I aint using gamespy.....

From my opinion its shit becuae you can have characters you want for names and some people have the most complecated names and it takes about 10 minutes to get their name right to kick em.

you really shouldn't be running a server if you don't know you can ban/kick by id in the fds or by using /<X> where x is the first part of there name and it prints out there whole name :rolleyes:

Besides that, if thats the only reason why don't want to run a gsa server, its really weak. :rolleyes:

Thats why I wan't a serial number, for the FDS!! For WOL.

Then I can maybe run BR Net etc. I don't why but I just aint running my server on GSA and that was only one reason.
