Ok Im not sure how to put this but i need some gmax buildings such as a few , repair pad and temple of nod. Those are two peticuluar ones i need. Also any others would be fine. I know your thinking why dont i just use XXC mixer and take them out yourself. Well they come out in w3d format and i dont know how to change w3d to gmax or open gmax and open a w3d file. I have the plug-ins but im not sure how considering they didnt come with a read-me. Any help would be appreciated.
