When i log in to WOL AGL(advanced game listings)

The game freezes for about 2 min.

Then it goes back to normal!

Oh, I have that problem, too.

But it's really more like 30 seconds, not 2 minutes, and it doesn't exactly kill the gameplay.

yup, it freezes at the motd because you have too many custom files i think (skins, maps, mods, etc.)

it's not skins or maps.

---

It's only .pkg files

the more you have the longer AGL takes to load.

Remove all .pkg's into another folder and your problem is solved.

I had this problem when i installed a Mod i think, the file was over 200MB, it tries to load it, and it can't handle it, hence an error. Try looking through your /Data/ folder, see whats there..

Titan1x77it's not skins or maps.

It's only .pkg files

the more you have the longer AGL takes to load.

Remove all .pkg's into another folder and your problem is solved.

I have no .pkg files installed and I still get a 30 second delay, I've gotten a connect delay ever since the first WOL crash after WW was shut down.

As many will tell you, renegade can become unstable for whatever reason problems like if you had not had them before can usually be remedied wuth a fresh install.

And yes I have had that problem in the past

they call mee mr freez :/

renegade used to freeze up on me when i had a shit load of .pkg's and other maps.. i barely have any custom maps/mods/skins now and it never freezes

remove the shit :/

---
