Hi. Like the topic says, I'm writing an FAQ for multiplayer strategies to put up on GameFAQs.com. I need an experienced player (preferably ranked in the 1000's or under) that knows what they're talking about to tell me if I'm on the right track.

You can post here, AIM (MyNamesPMS) or MSN (TeaAddict4Life@hotmail.com) me, or e-mail me (TeaAddict4Life@hotmail.com). Thanks a ton in advance.

Creed3020Rank means shit.

Yep. While there are skilled players with low ranks, a lot of people can become a mod of a server and can kick opposing players on the other team to win and get good ranking. I've seen it happen too many times.

If you play in certain servers long enough, you will notice who is actually good. I thought it was lovely when the ranking froze, but I always play this mental game with myself to get a good rank (even though it's pointless).
