Subject: JG features
Posted by SS217 on Fri, 05 Mar 2004 00:44:59 GMT

Alright folks, I'm trying to make JG as customizable as possible and as I proof read my scripts I'll post in this thread. A few things that I need your opinions on.

1. If a user is not identified as a moderator call a poll? (Only for qkick, kick, tban)
A) Yes
B) No
C) Let it be chosen by server owner
2. Auto connect to update server for new versions of scripts?
A) Yes
B) No
C) Let it be chosen by server owner
3. Use a host rank above admins (ties into flag system)
A) Yes
B) No
4. Moderator powers.
A) Use a flag system where you can have a VIP with the power to kick or a voice that can ban, etc.
B) Use a set system where VIP cannot kick but are unkickable voices can qkick and kick halfops can qkick kick tban operators can qkick kick tban ban admins can qkick kick tban ban and are unkickable and hosts can qkick kick tban ban are unkickable and can ban mods
C) Let it be chosen by server owner
5. Assume IRC server has +h
A) Yes
B) No
C) Let it be specified by server owner
Note: Since halfops are closer to ops than voices voices will not inherit any halfop powers if the IRCd does not support +h
6. Report major events and commands to an admin channel?
A) Yes
B) No
7. Restrict team chat to an admin channel
A) Yes
B) No
C) Send team chat via wallchops
D) Let server host choose
8. Log IP addresses?
A) Yes
B) No
C) Let serve admin choose
9. Log polls?
A) Yes
B) No
C) Let server host choose
10. Let users emotely change server / JG config settings using /notice JGbotick !command

remoteadminpass or custompass?
A) Yes
B) No
C) Yes, but a custom password instead of remote admin

Well, that's all I can think of now. Don't ask me for a release date because I formatted and the only copy of JG left was one I made for #jteksvrs so I have to edit and customize.

1. A) Yes
2. A) Yes
3. A) Yes
4. B) Use a set system where VIP cannot kick but are unkickable voices can qkick and kick halfops can qkick kick tban operators can qkick kick tban ban admins can qkick kick tban ban and are unkickable and hosts can qkick kick tban ban are unkickable and can ban mods
5. B) No
6. A) Yes
7. A) Yes
8. B) No
9. A) Yes
10. C) Yes, but a custom password instead of remote admin

I would consider LOGGING IP's, but don't make them viewable in a public IRC chan. Also, I would limit IP searching to Admins/Host only.

Scripting with JG:
JTeKGuard uses mIRC signals to send messages for parsing, you'll need to know mIRC scripting which takes maybe a week to be able to create complicated scripts. To make a in-game command:

Make a new file in notepad.

Add the default JG header, else the script will not be supported.

```
/*
<ASCII art>
By: SS, Whitedragon, vloktboky.
Thanks to: Dante (winrem) vloktboky (BCF) I forgot his name (FDSTalk.dll) Whitedragon (Ladder
scripts,blind.jg, etc, etc)
Testers: c4thecat SS o0oHxSo0o Adad
ScriptName.fileextension (.mrc,.jg,.jgbs,.jgs are suporrted, though it doesn't matter)
*/

on *:signal:fdslog: {
if (!testcommandhere == $2) {
statementshere
there are also a number of alias' premade used throughout JG. These include: winrem,
winrempage, version,modfilechk,bac,awy
we'll use winrem (Winrem and winrempage have flood protection in case a script / user starts to
spam)
winrem Test command (or run winrem.exe msg (JTeKGuard): Test command)
}
}
```

View Forum Message <> Reply to Message

Release date is unknown, I'm fixing bugs right now, it's based on the same bot that ran
JTeKSvr06. I had a more finished product but it got lost in a reformat.

what a waste :rolleyes:
Now that so many servers are begining to use wolspy, who want to run this bot if It can't support
long names or spaces :rolleyes:
Not to mention, no gamespy support :rolleyes:

Who uses Gayspy besides you Alkaline? The list is lame in comparison to the total number of dedicated WOL servers.

Subject: JG features
Posted by Alkaline on Fri, 26 Mar 2004 19:18:31 GMT
View Forum Message <> Reply to Message

People that can beat the hell out of WOL people all the time play on gamespy because they want competetion.

WOLSPY is good because gsa people join and own all the wol people. Just like you.

Anyway, brenbot is out and its free, it supports linux, gsa, wol e.t.c. Unless you run only WOL I see no use for this.

The current trend is that a lot of servers of the big server are running wolspy. Maybe you can stick to your puny 8 player ones :twisted:

Um. Last I check BCServ, which happens to be the most advanced and successful network of gaming servers for Renegade, doesn't use WOLspy. And GameSpy support will eventually be added. I just have to do a few things. Now get out of my thread, and stop flaming everything on JTeKGuard

AlkalineWOLSPY is good because gsa people join and own all the wol people. Just like you.

Funny, it seemed they were equally matched on my server. I honestly dont think the software you use to connect to a game affects your skill.

Quote:Anyway, brenbot is out and its free, it supports linux, gsa, wol e.t.c. Unless you run only WOL I see no use for this.

Brenbot is great software, but it can't be customized very heavily to suite a server owners needs

at this point.

Quote:The current trend is that a lot of servers of the big server are running wolspy. Maybe you can stick to your puny 8 player ones :twisted:

Just because it's a trend doesnt make it good. I ran it on my server for about a week and cheaters from GSA flooded in.

Subject: JG features

View Forum Message <> Reply to Message

Well I have been running wolspy servers for 4 months now and wol people are generally not good. Occasionally I see people that are ok, but majority of the time people don't know what is going on.

b.t.w. a lot more cheaters on WOL then on GSA, in fact many good players are accused of cheating on WOL servers.

View Forum Message <> Reply to Message

SS217, the name sounds like some dickless faggot robot.
You should start a petetion to get my size 14 Doc Martin boot out of your ass first.

Puft, JG what a pos. Ohh What do you mean succesfull servers only? N00bstroies, willostorm, dangerous gaming are all running wolspy servers. Not to mention 4 UN servers which are full all the time :rolleyes:

Black-cell doesn't run wolspy probably because they use the Page feature a lot on there bot.
Seing as you are just copy-catting them I don't think you will have gspy support :rolleyes:

haremanUmmmm ...as I recall WOI players kicked the snot out of the GheySPy people and again as I recall you guys wanted nothing to do with a rematch

When was this? I keep hearing about this match, but all I see in any wolspy server is that the top 5 players are always from GSA dominating all the WOL players... its a pretty constant trend.

The best players seem to be on gamespy, only find random fools on wol, excpet for the select few.

Hmmm....ya know, I am sick and tired of seeing your stupid posts. Why don't you just leave??
You would make everyone here very happy. Seems to me that you are just jealous that Snipesimo has more friends than you.

Here is what I think of you:

You are some 12 year old little kid that gets picked on in school, so you come on the internet, and find someone to argue with. You make yourself sound tough when in fact you are nothing, a worthless piece of trash. Get a life, grow up, and shut-up.

He does the same, putting his gay ass comments for no reason, then coupled with your crap its
only a matter of time before Crimson moves them to politics (I don't know how the heck they are
related to polictics, but thats another story...) or mac closes them.

Since your groups of crackheads have managed to locked/delete/move all my threads I will make
it hellish for you guys :twisted:

You do the exact same thing. As I have told you before, one of you need to step up, stop acting like children, and stop flaming. But, untill one of you becomes mature enough to do this feel free to continue with your pointless flamefest.

Hmmm..maybe I am right, and that is why you don't really have a reply? Also, I picked this name because yes, I like the Matrix movies.

First off, you saying that I am a homo...that is just so undeniably stupid. You don't even know me, because if you did you would know that I am married, with two children.

I've seen your type before, you troll forums, looking for a fight with someone because you have had such a lame childhood. You have no friends in the real world, because you are such a loser. Now, look you have so many people here that don't want you around....so why do you chose to stay?

4/12

Major updates today

-Two INI's were made to control JG instead of variables
-Fixed several annoying bugs
-JG source code printed out, about 100 pages of mIRC scripting
-JG saved to disk
-Changed the way kick timers work (Thanks WD)

Subject: JG features
Posted by snipesimo on Mon, 12 Apr 2004 14:34:35 GMT

how many lines does that add up to?

Subject: JG features
Posted by SS217 on Mon, 12 Apr 2004 15:25:07 GMT
View Forum Message <> Reply to Message

God knows, I seperated it into about 56 different files. ex there's one file containing the qkick script for channels, one for in-game. Basically it makes it easier to change and it's easier on the auto-update server which should be my Linux box.
