DrasticDR Try this one http://www.beaconpedestal.com/nocd/djlaptop_renegade_1037_nocd.exe

Yeah!!! This is the official no-cd crack!

You only need to remove the Safedisk 2 protection from the game.exe to run it from your hard drive. Multiplayer works fine, which is the only thing you will need it for if your playing with no disk.

Subject: thanks

but.. i forgot to mention even before I got the patch, it said that a debugger has been detected. Please remove it and try again.... and then when I run Djlaptops patch it just says that game.exe is unknown and wont let me go further.

I've been using DJ Laptop's no-cd for ages with no problem at all. I have no clue about your problem...Sorry!

Search for "Safe Disk 2 Cleaner" and then download it and run it on game.exe, it should produce a copy of game.exe you can run without needing the CD, although for singleplayer you will need the cd to access the movies and stuff.
