How is that considered a cheat?  
It just changes the look of the scope. Doesn't change color, or scope power...

In fact its used in some mods.

It takes the black and green parts, and makes them clear. IT looks like it does when you are unzoomed. Tell me that is not beneficial?

Quote: i wanna know exactly were the freggin new scope skin is that changes the nitevision scope into clear hunters style

I am assuming you mean a scope like the one used in Renalert(changes green part to clear but leaves black around scope) and not the one posted below which lets you zoom with whole screen.

<http://www.n00bstories.com/image.fetch.php?id=1317993270>

Note: This is not me, I got this picture off the internet. I didn't want to link directly to the site or people would know where to get cheats.

You stoopid n00b.

I read the subject and thought  
"Hey, scope change on the renguard project? Hmm, wonder what they are going to cut out"

Read the post only to find out that some idiot wants to know how to cheat. VERY NICE!  
Hmm, lemme look up your IP so that I can ban you from my server for being a dumbass.

I searched on google and found four sites for renegade cheat skins, hacks, etc. If you want them that bad get off your lazy ass they are not hard to find. Or you can choose to try and get skilled instead of cheating, in the long run this would probably be your better option.

I used that scope for two seconds, because my cousin told me it was a cool skin. I hated it, it made it harder to aim, so I deleted it right away. Sniping in renegade sucks anyway, but its not as bad as sniping in far cry.

tooncy..., but its not as bad as sniping in far cry.

I think the sniping model of Far Cry is one of it's plus (well it has not much in my opinion )

Just lay down while sniping and your fine

I actually quite like sniping in renegade, however I do have too issues with it.

1.> The texture mapping is not recalibrated when you zoom.

2.> Then Z clipping plain is not adjusted.
