Does anyone know of a good sound editor, or a voice editor? I need one for a project of my Dad's . . . after it's all done (A couple months or more) I'll post a topic up here about it. I'm sure some of you will find it interesting or useful. We are trying to get it done before summer time . . . Mid June and so far we are doing fine.

Thank You in advance . . .

Oh yeah try to get Nero Wave editor, or Goldwave, both work great.

Thanks Dante, I'll have to check out that Sound Forge thing . . . So you can buy stuff with Kaazaa now instead of illegally downloading it? When did they add that? LOL!

BlazerI suggest Cool Edit Pro or SoundForge.

If you have the chance get Samplitude Producer 2496. That programm Ownz all

The latest version costs about 2000 dollars... but the 30day's evaluation is also good jsut with some limitations (e.g. no Mp3 output) also some PC-Magaziines offers free older versions of this r0xing programm. (I got one of this versions and its doing it's job as good as the 'big brother')
