I have try to set brenbot on the lwd server
If I start brenbot he set every 30seconds the player info in the renegade master control and also
make the server very laggy is this normal for brenbot or is this only by us

and by blazeregulator if I start that prog he gif a error about flooding the server it is all so new for
me please help me

grtz

It will mostly depend on how many players the server is set for and the CPU. If the server is
maxing out the CPU usage just holding full capacity of players, it might be best to lower it by 5
players to take some stress off.
